Dear Principals/Teachers:

The Western U. P. Center for Science, Mathematics and Environmental Education announces the Spring 2007 Assembly Tour by the Great Lakes Aquarium from Monday-Friday, February 26-March 2 for CCISD & GOISD schools.

Two different one-hour assembly programs are available for K-6 students, plus a variety of classroom programs (see descriptions below). Assemblies include skits, demonstrations, audience participation, slides, and Lake Superior sounds, and incorporate audience participation. They are fun, interactive and informative! References from other schools are available upon request or check out their website: http://www.glaquarium.org/

Deadline to Register: Friday, January 26th.

Assembly Programs (1-hour each)

(1) Getting A HEAD with Habitat Hank (K-6):
The Great Lakes Aquarium brings you a high-energy, hour-long interactive assembly featuring fish and fish habitats. Students will actively participate in skits and activities related to Habitat needs, aquatic Ecology, Adaptations, and animal Diversity. This program includes student dress-ups, a visit with the Sturgeon General, shopping with Habitat Hank, and much more!

(2) Our Great Lake Superior (K-6):
Comes with a full cast of characters that educate and entertain. Enthralled students will learn about the history of Lake Superior, the animals that make their home in the lake and the diverse cultural history of the Lake Superior region.

Classroom Programs (1 class period)

A Bony Bunch (K-1): Do fish have backbones? Do insects have skeletons? These questions and others will be answered as live animals and props are used to discuss the difference between those animals that have backbones (vertebrates) and those that do not (invertebrates).

Keeping the Lights (K-1): Step into the past with your students, to the days when Lake Superior lighthouses were run by keepers and their families. Learn about life at the lighthouse, including the regular tasks of keeping the light burning, polishing brass, and tending gardens. Fishing and playing games were also part of lighthouse life. Students will visit with a keeper or keeper’s wife.

Creepy Crawlies* (K-3): Do bugs bug you? Do you shudder at the thought of a slithering snake? Students will learn more about animals that creep and crawl and find that they aren’t quite so scary! In fact, many of these are quite beneficial to humans and play an important role in our ecosystem. Students will meet some of these creatures close up and learn about their important ecological role.
Herpetology - Slime and Scales* (Gr. 4-6): Whether they love ‘em or hate ‘em, most students are utterly fascinated with reptiles and amphibians! Students will learn characteristics of reptiles and amphibians, see how they have adapted to various habitats, learn about their life cycles and the about the reptiles and amphibians native to the Great Lakes region, get to experience hands-on activities and props including snake skins, turtle shells, and a live reptile or amphibian.

Stories in Stone - Lake Superior Geology (Gr. 4-5): Can rocks tell a story? If you know what to listen for, stones can tell many tales. What are they made of and how did they form? How can you tell them apart? Students will examine and learn to identify local rocks. They will classify the types of rocks and study some of the geologic forces that shaped the Lake Superior region. Students will even get to participate in a “geo-theater” presentation on the formation of Lake Superior!

SET-UP / TEAR DOWN TIME: Please allow 45 minutes for assembly set up time, 20-30 minutes between assemblies at the same school, and 45 minutes to pack up after the assembly.

COST: The costs listed below include a share of the presenters’ travel expenses which will total approximately $600 for travel & hotel for the week. The Copper Country ISD will send invoices to each school.
- Assembly programs: $275 for first assembly; $125 for each additional assembly.
- Classroom programs: $75 for first program; $50 for additional classroom programs.

TO REGISTER: Email or fax (487-1620) the attached registration form to Joan Chadde at the Western U. P. Center for Science, Mathematics and Environmental Education by Friday, January 26th. Please choose several dates and times that work for your school. We’ll arrange the most efficient schedule for the presenters that also meet your needs.

FOR MORE INFORMATION: contact Joan Chadde, at 487-3341 or email jchadde@mtu.edu

Take advantage of this exciting educational opportunity!!!
