Friday, April 12 ~ 8:30 am - 4:00 pm
Meet at the CCISD in Hancock at 8:15 am

Keweenaw Geology Teacher Workshop

About the Workshop:
Spend an exciting day exploring the geologic features of the Keweenaw Peninsula! While these places may be familiar backdrops to our lives, we will discover the geologic processes responsible for their formation.
- Investigate local examples of Earth Science concepts
- Build skills & practice investigation methods used by earth scientists
- Learn about EarthCaching—an exciting educational outdoor adventure
- Additional topics include Earth history, rock cycle, plate tectonics, earth system interactions, and ancient copper mining.

How to Register
CONTACT: Loret Roberts at 482-0331 or loret@copperisd.org

Registration Deadline:
April 1st (Max: 20 participants)

COST: $40; includes lunch, transportation, books
(no charge to LSSI teachers & community partners)

Credit: 0.7 SB-CEUs
